
Dashboard selected
Use loaded CSV data tables
Filter incidents by selected date range
Filter safety observations by selected date range
Calculate average equipment availability
Find open critical equipment alerts
Calculate incident count and near-miss count
Count high and critical observations
Count workers and calculate PPE compliance
Count total equipment and equipment not under maintenance
Count equipment under maintenance and equipment alerts
Display KPI cards
Display incident severity and department charts
Display equipment maintenance and alert severity charts
Are there open critical equipment alerts?
Yes
No
Display the open critical alert records
Display no open critical alerts message
End

Interactive analysis selected
Display analysis questions
Question selected?
Incidents by department
Select incident date range
Count unique incidents by department
Matching incidents?
Yes
No
Display leading department chart and table
Display no incidents message
Downtime or availability
Select measure
Rank equipment by selected measure
Display highest downtime or lowest availability
Display chart and top equipment records
Vibration or temperature
Select measurement
Convert readings to numbers and remove missing readings
Rank equipment by reading
Readings available?
Yes
No
Display highest reading chart and table
Display no readings message
Equipment alerts
Select equipment alerts
Count alerts by equipment
Alerts available?
Yes
No
Display equipment with most alerts chart and table
Display no alerts message
Maintenance priority
Calculate maintenance flags
Filter and rank flagged equipment
Any equipment flagged?
Yes
No
Display prioritized equipment table
Display no matching equipment message
Incident causes
Count incidents by cause
Display cause chart and table
High-risk observations
Select high and critical observations
Count observations by department
Display chart and table
Department comparison
Select incident and observation date ranges
Calculate safety incident and observation counts by department
Calculate average equipment downtime and alert counts
Combine and sort department indicators
Display comparison table
Equipment condition limits
Assess temperature and vibration
Count equipment with both readings classified as normal
Calculate percentage of total equipment
Display percentage and condition table
End
